WORK EXPERIENCE

REACT + REDUX DEVELOPMENT

[E-commerce](#) | Ago. 2022

In order to create a light and easy to use navigation, I build a project in react and redux, where the user can create an account, add products to the cart, modify the cart, add purchases to the history among other things. Postman, canva, bootstrapm, routes and npm libraries were used.

HTML5 + CSS + JAVASCRIPT

[Trainify](#) | Jul. 2022

In an amazing project with Epic Brands, I used HTML5, CSS, and JavaScript to port Epic Brands' stunning and unique designs created in Illustrator to the web. One of the most difficult tasks was to make a new design with the same elements provided by Epic Brands for the mobile site view.

REACT

[Pokedex](#) | Jul. 2022

I made a pokemon web application showing the different pokemons and their abilities that you can only see with your username. The application has dark mode and setting of pokemons per page, as well as search filters, either by name or type of Pokemon. Use of Rest.

STUDIES

ACADEMNLO

Full Stack certification

• May, 2022 - January, 2023
